What is The Vertical Flight Society?

- The international **professional society of 6,500 members working to advance vertical flight**
 - Founded in Feb 1943 as the **American Helicopter Society (AHS)**
 - Everything from VTOL **MAVs/UAS** to **helicopters, eVTOL, etc.**
- **Expands knowledge** about vertical flight technology and promotes its application around the world
- Advances **safety and acceptability**
- Advocates for vertical flight **R&D funding**
- Helps **educate and support** today's and tomorrow's vertical flight engineers and leaders
- **Brings together the community** — industry, academia and government agencies — to tackle the toughest challenges

 - eVTOL short course videos (150+ hours)

www.eVTOL.news

The screenshot shows the homepage of the Electric VTOL News website. At the top, there is a navigation bar with the phone number +1-703-684-6777, email news@evtol.news, and social media icons for Facebook, Instagram, LinkedIn, and Twitter. The main header features the Electric VTOL News logo and a Siemens advertisement with the tagline "Where today meets tomorrow". Below the header is a navigation menu with links for Home, Vertiflite Articles, eVTOL Aircraft Directory, Events, Videos, Resources, News, and a search icon. The main content area is titled "Home" and includes a featured article about the Electric VTOL News™ highlighting the progress of all-electric and hybrid-electric powered vertical takeoff and landing (eVTOL) aircraft. It also mentions a newsletter sign-up and a directory of 700 eVTOL aircraft. On the right side, there is a "Recent Pages" section listing various aircraft models and a "Recent Vertical Flight Society Events" section listing upcoming workshops and forums. At the bottom, there is a "Recent Vertical Flight Society Events" section listing past events and a "World eVTOL Aircraft Directory" advertisement.
