Establishing AAM Urban Operations Center

The creation of a new domain as complex as UTM and AAM requires a robust collaboration of stakeholders

- Longbow, Hampton University, The City of Hampton, The State of Virginia, Severe Weather Research Center, NASA, The FAA, industry experts from around the world

- Collaboration between companies in the Advanced Air Mobility (AAM) industry and the City of Hampton on AAM initiatives can be mutually beneficial for several important reasons

- Community Integration
- Regulatory Support
- Infrastructure Development
- Economic Incentives
- Talent Pool Labor Force
- R&D Partnerships
- Test and Validation Opportunities
- Demonstration Projects
- Brand Visibility

- Why Advanced Air Mobility (AAM) Community Development in Hampton, Virginia, is Important

- Urban Congestion Alleviation
- Economic Growth
- Job Creation
- Emergency Response
- Technological Leadership
- Connectivity and Accessibility
- Environmental Sustainability
- Becoming an AAM/UTM R&D Hub
- Global Lead in Urban Air Mobility Development
- Infrastructure Investment
- Resilience and Disaster Preparedness
